SOFTLAYER Customer Portal x

SoftLayer Technologies, Inc. [US] https://control.softlayer.com

Devices Storage **Network** Security Marketplace

Network

Find information on ordering Network options below. All Network order links will direct you to other locations within Control unless marked otherwise.

Citrix NetScaler VPX

Cost effectively deploy the same L4 load balancing, L7 traffic management, TCP and SSL offload, content caching and compression and web application firewall functionality used by the largest websites in the world.

[+ Order](#)

IPSec VPN

IPSec VPN facilitates connectivity from your secure network to SoftLayer's private network. IPSec VPN connections are dedicated to a single datacenter

[+ Order](#)

Subnets / IPs

Order static, public or private IPs in portable or global subnets. IPv6 addresses are available in /64 blocks with a limit of 5 per customer. IPv4 addresses are currently available as single /32 addresses with a limit of 5 per customer.

[+ Order](#)

Vyatta

Vyatta protects your cloud infrastructure and optimizes its performance. Create virtual routers, virtual firewalls, and virtual VPN devices and manage devices through userdefined parameters.

[+ Order](#)

Local Load Balancer

Load Balancers distribute processing and communications across servers within a single data center to alleviate a high processing load on a single device. Customize each balancing solution to distribute traffic using a variety of balancing methods, including persistent and non-persistent methods, and update assigned methods with minimal downtime.

[+ Order](#)

Security

Find information on ordering Security options below. All Security order links will direct you to locations within Control unless marked otherwise.

Hardware Firewall

Add Standard Hardware Firewalls to give individual servers an additional layer of server security. Our firewalls are provisioned on demand without service interruptions.

Hardware Firewall (Dedicated)

With SoftLayer Dedicated Hardware Firewalls you can protect one, multiple or even all servers that share the same VLAN for the highest assurance of uptime.
